

To whom it may concern,

Please be informed that the European Chemicals Agency (ECHA) has issued an update on 21.01.2025, incorporating additional chemicals into the candidate list of Substances of Very High Concern (SVHC). We hereby affirm that none of the recently included chemicals to the REACH candidate list are utilized in our operational processes or present in the articles comprising our products.

Furthermore, products of AKSA fulfill the requirement that substances restricted under REACH Regulation which pose serious risks to human health, marine and terrestrial life are not released to environment and not available on our products above the defined threshold by Article 33 of the REACH Regulation. Additionally, our products contain less than 0.1% (w/w) of DMAc (N,N-Dimethylacetamide), in accordance with the legal threshold. The product categories certified by OEKO-TEX Standard 100 which ensure compliance with REACH regulations and confirm the absence of SVHCs, available for review on our official website.

As certified by ISO 9001, ISO 14001, ISO 45001, ISO 50001, ISO 14046, and ISO 14064, AKSA upholds a strict commitment to environmental stewardship, occupational health, and safety across all activities of its operations. Our endeavors are geared towards perpetual enhancement of operational efficiency while diligently fulfilling our obligations to stakeholders.

Best Regards,
