2. Presentation of the Financial Statements

i. Basis of Presentation:

The Parent Company and its Subsidiaries maintain their books of account and prepare their statutory financial statements in New Turkish Liras (TRY) in accordance with the prevailing commercial and financial legislation. The accompanying financial statements are prepared in accordance with the Capital Markets Board (CMB) Communiqué Nr. XI/29 “Communiqué Related to the Financial Reporting Principles at the Capital Markets”. This Communiqué has come into force starting with the first interim financial statements subsequent to 1 January 2008 and bears in its Article 5 the provision stating that the enterprises subject to CMB apply the International Accounting / Financial Reporting Standards as accepted by the European Union (EU) which is compliant with the Turkish Accounting / Financial Reporting Standards (TAS/TFRS), issued by the Turkish Accounting Standards Board (TASB). Furthermore, in the provisional Article 2 of the same Communiqué it is stated that the IAS/IFRS are to be applied until the differences between the IAS/IFRS accepted by the European Union and those issued by the International Accounting Standards Board (IASB) are published by the TASB and as a consequence of this, it is promulgated that TAS/TFRS which are in full compliance with IFRS will be the basis of all financial statements.

However, the Turkish Accounting Standards Board (“TASB”) has not issued the differences between the IAS/IFRS that are accepted by the EU and the actual IAS/IFRS issued by the International Accounting Standards Board (“IASB”) yet; and therefore the accompanying financial statements are prepared in accordance with the IAS/IFRS which are in full compliance with the TAS/TFRS issued by the TASB. As required by the TFRS1, comparative financial statements are prepared on the same basis. As stated below, certain adjustments and classifications have been made during the preparation of the accompanying financial statements in order to comply with the TAS/TFRS.

2. Presentation of the Financial Statements (continued)

i. Basis of Presentation (continued):

The accompanying financial statements and explanatory notes are presented in accordance with the mandatory formats and principles announced by CMB in its Weekly Bulletin dated 14-18 April 2008 Nr. 2008/16.

The Company's financial statements prepared as of 30 September 2008 in accordance with the Communiqué Nr. XI/29 have been approved by the Board of Directors at 19 November 2008.

The Company retains the power to change its interim financials by Board resolution and the General Assembly retains the power to change the annual financial statements.

ii. Adjustment of Financial Statements During Hyper-Inflationary Periods:

TAS 29 deals with the effects of inflation on financial statements and requires that financial statements prepared in the currency of a high inflation economy be stated in terms of the measuring unit current at the balance sheet date and that corresponding figures for previous periods be restated in the same terms. As per the resolution of the CMB dated 17 March 2005 Nr 11/367 the application of inflation adjustment of the financial statements has ended in 2005, hence the accompanying financial statements are restated at the purchasing value of the Turkish Lira as at 31 December 2004.

The restatement of the accompanying financial statements in Turkish Lira as at 31 December 2004 are calculated by means of conversion factors derived from the countrywide wholesale price index published by the Turkish Statistical Institute (TSI). Such indices and conversion factors are as follows:

Date	Index	Conversion Factor
31 December 2001	4.951,7	1,70
31 December 2002	6.478,8	1,30
31 December 2003	7.382,1	1,14
31 December 2004	8.403,8	1,00

The following principles have been applied in the preparation of the restated financial statements as of 31 December 2004:

- Financial statements are stated in terms of the measuring unit current at 31 December 2004 and the corresponding figures for the previous periods are restated in the same terms.

- Monetary assets and liabilities are not restated because they are already expressed in terms of the monetary unit current at the balance sheet date.

2. Presentation of the Financial Statements (continued)

ii. Adjustment of Financial Statements During Hyper-Inflationary Periods (continued):

- Non-monetary assets and liabilities are restated by applying the relevant conversion factors.

- The effect of general inflation is included in the statement of income as “Net Monetary Gain / (Loss)”

Additions to non-monetary items subsequent to 1 January 2005 are stated at their nominal values.

iii. Consolidation Principles :

Consolidation is realized within the Parent Company, Aksa Akrilik Kimya Sanayii A.Ş. and the direct and indirect shareholdings of the Parent Company within its subsidiaries are as follows :

Subsidiaries	30 September 2008	31 December 2007
Ak-Pa Tekstil İhracat Pazarlama A.Ş. (1)	13,47 %	13,47 %
Ak-Tops Tekstil San. A.Ş. (1)	60,00 %	60,00 %
Fitco BV (2)	100,00 %	100,00 %
Aksa Egypt Acrylic Fiber Industry SAE (2)	99,14 %	99,14 %
Akgirişim Kimya ve Ticaret A.Ş. (2)	58,00 %	58,00 %

(1) Stated in the accompanying consolidated financial statements as per the full consolidation method.

(2) Stated in the accompanying consolidated financial statements at cost due to its immaterial effect.

Affiliates	30 September 2008	31 December 2007
Ak-Han Bakım Yönt. Serv. Hizm. Güven. Malz. A.Ş. *	-	33,33 %

* Sold at 16 July 2008. As it has immaterial effect on the consolidated financial statements as of 31 December 2007, it is stated in the accompanying financial statements at cost.

Subsidiaries and affiliates are classified as financial assets available for sale representing shareholdings in which the direct and indirect votes of the Parent Company is below 20% or with insignificant influence even if above 20%, or those that do not have material effect on financial statements, or are not traded in the active markets or whose fair values cannot be determined reliably, are recognised at their restated cost values, less provision for value decrease, if any.

2. Presentation of the Financial Statements (continued)

iii. Consolidation Principles (continued):

Consolidated financial statements have been prepared on the basis of principles stated below:

Full Consolidation Method :

- All balance sheet items except for the paid in capital of the Parent Company and its Subsidiaries and their equities at the acquisition date are added, and inter-company balances are eliminated.
- The Parent Company's interest in the subsidiaries is set off against the Long Term Financial Assets account of the Parent Company and the Share Capital accounts of the Subsidiaries.
- As of the acquisition date, the Parent Company's shareholding in its subsidiaries is offset against the portion of share capital it owns in the subsidiary's equity for one time only. The equity of the subsidiary at the acquisition date should be drawn up according to the market value of the subsidiary's net assets at that date. The difference that appears in favor of the recorded value is recognized as positive goodwill in the consolidated balance sheet as a separate item and that which appears against the recorded value is recognized as negative goodwill in the statement of income. The Parent Company has taken over at a total price of TRY 16.250.000,00 the participation shares of TRY 1.000.000 nominal value representing 50% of the share capital of Aktops Tekstil Sanayi A.Ş., a company under the ownership of Akkök Sanayi Yatırım ve Geliştirme A.Ş., with a share capital of TRY 2.000.000 which is directly related to the Parent Company's principal activities and which makes exclusive custom manufacturing for the Parent Company and whose share transfer fee has been determined by the Valuation Report submitted by İş Yatırım Menkul Değerler A.Ş. as of 8 June 2007.
- As the cost of acquired subsidiary is higher than the value of shares stated among equities in the balance sheets prepared in accordance with TAS/TFRS at the acquisition dates of the subsidiaries, a total positive goodwill of TRY 5.988.651 has been created (Note 12). In the event of any value decrease related to the goodwill amount, it is reflected to the statement of income. A value decrease test is performed at the same date of each year in order to determined if there is any value decrease in the goodwill.
- Minority interests are deducted from all equity account group items including the paid in/issued share capital of subsidiaries included in the consolidation and are recognized as "Minority Interests" in the Equity Section of the consolidated balance sheet and in the consolidated statement of income, as an item separated from the Parent Company's equity share.

2. Presentation of the Financial Statements (continued)

iii. Consolidation Principles (continued):

Full Consolidation Method (continued):

- The purchase and sales among the Parent Company and its Subsidiaries and the profit and losses arising from these transactions are eliminated in the Consolidated Income Statement. Profit and losses arising from the purchase or sale of marketable securities, inventories, tangible and intangible assets, long term financial assets and other assets among the consolidated group companies are also eliminated.

iv. Adjustments :

The accompanying consolidated financial statements have been prepared in accordance with the TAS/TFRS with the below mentioned adjustments which are not stated in the statutory records:

- Rediscount calculation on post-dated cheques, notes receivable, customers, notes payable, suppliers, and loans
- Depreciation adjustment
- Deferred tax adjustment
- Provision for litigation
- Provision for termination indemnity and vacation
- Forward interest accrual
- Elimination of inter-group balances and transactions as per the consolidation procedure

v. Comparative Information and Adjustment of Prior Period Financial Statements:

Consolidated balance sheets as of 30 September 2008 and 31 December 2007 and notes to the balance sheets as well as the consolidated statements of income, changes in equity, and cash flows for the nine month periods ended 30 September 2008 and 2007 have been presented comparatively. The below mentioned investment sales should be taken into consideration in the valuation of the said comparative consolidated financial statements. In order to comply with the presentation of the current period financial statements, the comparative information is reclassified when deemed necessary. The goodwill amortization reversed in accordance with the TAS/TFRS has increased the profit for the period in the year ended 31 December 2007 and the nine months period ended 30 September 2007 by TRY 199.623 and TRY 49.906 respectively, and increased the retained earnings by TRY 76.697 as of 31 December 2007.

2. Presentation of the Financial Statements (continued)

v. Comparative Information and Adjustment of Prior Period Financial Statements (continued):

A total of 152.468.983 participation shares at a total nominal value of TRY 1.524.689,83 owned by the company Ak Havacılık ve Ulaştırma Hizmetleri A.Ş., an affiliate of the Parent Company, which correspond to 7,33% of the company share capital has been sold to Akkök Sanayi Yatırım ve Geliştirme A.Ş. as per the valuation report prepared by Kapital Bağımsız Denetim ve Yeminli Mali Müşavirlik A.Ş. at a total value of TRY 2.748.176,00 and the sales transaction has been realized on 18 September 2007. As per the legal records, a total income of TRY 1.223.486,17 has been obtained upon sales of 152.468.983 participation shares owned by the Parent Company and due to inflation adjustment no sales profit has been calculated.

vi. Offsetting:

Offsetting financial assets and liabilities can only be made under the conditions where the offsetting transaction is legally allowed and the company has an intention in this respect or where the acquisition of assets and fulfillment of liabilities are realized simultaneously.

vii. Accounting Policies, Changes and Errors in Accounting Estimates:

The Company has applied its accounting policies consistent with the prior year. Significant changes in the accounting policies and significant accounting errors are applied retroactively and the prior period financials are re-prepared. In the event that the changes in the accounting estimates are related to one period only, they are applied only to the period in which the change has been made; however, if they are related to the future periods, they are applied both to the period in which the change has been made and the future periods.

2. Presentation of the Financial Statements (continued)

viii. Significant Accounting Policies and Valuation Procedures Applied:

(a) Financial Instruments:

Financial instruments consist of the financial assets and liabilities stated below :

i. Cash and Cash Equivalents

Cash and cash equivalents consist of cash balances on hand, bank accounts, and cheques received.

Cash is composed of New Turkish Lira and foreign currency balances. The New Turkish Lira balances are stated at face values, and the foreign currency balances are translated into New Turkish Lira at the foreign exchange rate issued by the Central Bank as at the balance sheet date.

Bank accounts consist of demand and time deposit accounts and the related interest accrued. New Turkish Lira deposit accounts are stated at face values and foreign currency accounts are translated into New Turkish Lira at the foreign currency purchasing rate issued by the Central Bank as at the balance sheet date.

The cheques received with maturity dates exceeding the balance sheet date are stated in trade receivables and are rediscounted at a rate equivalent to the interest rate of government bonds constituted in stock markets or other organized markets.

Fair Value

As the foreign currency cash and cash equivalents are translated into New Turkish Lira at the foreign exchange rates valid at the balance sheet date, it is assumed that the fair values of these assets approximate to their book values.

As the deposit accounts, cash and cheques received are converted into cash in very short terms, and as there is no risk of value decrease, their book values are deemed to approximate to their fair values.

ii. Trade Receivables

Trade receivables are financial assets created by the Parent Company and its subsidiaries through selling goods and services directly to the customers. Trade receivables and post dated cheques are subject to rediscount.

Fair Value

Discounted trade receivables and doubtful receivables for which provisions are accrued are assumed to approximate to the fair values of these assets.

2. Presentation of the Financial Statements (continued)

viii. Significant Accounting Policies and Valuation Procedures Applied (continued):

(a) Financial Instruments (continued) :

iii. Related Parties

The shareholders, board members and administrative personnel such as the general manager, their immediate relatives as well as the related companies, affiliates and partnerships of the Parent Company and its subsidiaries are regarded as related parties.

Transactions with the related parties in connection with the Company's principal activities are realized at prices in line with the prevailing market conditions.

iv. Trade Payables

Trade payables are financial liabilities created through acquiring goods and services directly from the suppliers.

Fair Value

The discounted value of trade payable are assumed to approximate to their fair values.

v. Short and Long Term Bank Loans

Short and long term bank loans are stated at the value computed through addition of the principal amount and the interest expenses accrued as of the balance sheet date, discounted as per the effective interest method.

Fair Value

The fair value of the short and long term bank loans is assumed to be equivalent to the recorded values computed by adding the accrued interest liabilities calculated over the prevailing interest rate as of the balance sheet dates on the cost of the mentioned financial debts.

vi. Financial Derivative Instruments

The Parent Company enters into forward contracts with the objective to hedge against foreign currency risk arising from its operational and financial activities. The current value of outstanding contracts is calculated by using internal pricing models and the unrealized foreign exchange gains/losses are recognized in the statement of income.

2. Presentation of the Financial Statements (continued)

viii. Significant Accounting Policies and Valuation Procedures Applied (continued):

(b) Inventories:

Inventories are stated at the lower of cost or net realisable value. Cost is determined by weighted average cost method.

(c) Financial Investments:

The Parent Company has classified its financial investments as financial assets available for sale.

Financial assets available for sale consist of financial investments other than operating loans and receivables, and financial assets held until maturity and for trading purposes. Financial assets available for sale are valued at their fair value in the period following the initial recording. Financial assets available for sale in which the direct and indirect votes of the Parent Company is below 20% or with insignificant influence even if above 20%, or those that do not have material effect on financial statements, or are not traded in the active markets or whose fair values cannot be determined reliably, are recognised at their cost values, less provision for value decrease, if any.

Financial investments do not have a market value and are recognized at their unit values restated as of 31 December 2004, less provision for value decrease, if any.

(d) Tangible Assets :

Tangible assets are stated at cost less their accumulated depreciation and impairment loss, if any.

Tangible assets have been restated using the measuring unit current at 31 December 2004 from the dates of acquisition. Additions made subsequent to 1 January 2005 are stated at their nominal values. Tangible assets are depreciated over their inflation-adjusted values by straight-line method and the nominal values of additions subsequent to 1 January 2005 as per their useful lives stated below :

Buildings	5-50 years
Land improvements	2-50 years
Machinery, plant and equipment	3-20 years
Motor vehicles	4- 8 years
Furniture and fixtures	2-50 years
Other tangible assets	5 years

2. Presentation of the Financial Statements (continued)

viii. Significant Accounting Policies and Valuation Procedures Applied (continued):

(e) Intangible Assets :

Intangible assets are stated at cost less their accumulated amortisation and impairment loss, if any.

The acquisition values of intangible assets are considered in the restatement of intangible assets as at 31 December 2004. Additions made subsequent to 1 January 2005 are stated at their nominal values. Intangible assets are amortized over their inflation-adjusted values and the nominal values of additions subsequent to 1 January 2005, as per their useful lives stated below :

Rights	3-40 years
Special costs	1-5 years
Other intangible assets	3-5 years

(f) Assets and Liabilities in Foreign Currency :

Assets and liabilities in foreign currency are translated into New Turkish Lira at foreign exchange rates announced by the Turkish Central Bank as at the balance sheet dates. Transactions in foreign currencies during the period are translated into New Turkish Lira at the actual rates applicable on the transaction date. Exchange gains and losses resulting from such translations are included in the statements of income.

(g) Impairment of Assets:

In case where the book value of an asset exceeds its recoverable value, a provision for impairment loss is made so as to bring the book value of the asset down to the level of its fair value and the provision is recorded in the income statement as expense.

On the other hand, the recoverable value of cash generating assets is the higher of net selling price and the value in use. The value in use of those assets represents the net present value of net cash inflows to be acquired through continuous usage and sales of the assets, discounted at a reasonable discount rate.

2. Presentation of the Financial Statements (continued)

viii. Significant Accounting Policies and Valuation Procedures Applied (continued):

(h) Deferred Taxes :

Deferred taxes are calculated on the temporary differences that arise between the deductible tax base and the book values of assets and liabilities, by using the liability method. The main temporary differences arise from the income and expense items recognised in different periods with respect to the TAS/TFRS and the tax legislation. While deferred tax liabilities are calculated for all taxable temporary differences, deferred tax assets consisting of deductible temporary differences are calculated with the assumption that the Company will have taxable income during the future periods.

An enterprise should offset current tax assets and current tax liabilities if the enterprise has a legally enforceable right to set off the recognised amounts, provided that the tax assets and tax liabilities are subject to the tax legislation of the same jurisdiction.

(i) Income Taxes :

Corporate earnings are subject to corporation tax at a rate of 20%. In case investment allowance is deducted in the calculation of taxable income, same as with other profits exempted from corporation tax, no withholding calculation is required in cases where such earnings are not distributed. However in case the investment allowance used is based on the supplementary articles 1 and 6 of the Income Tax Law (ITL) which have been annulled by Law nr 4842, income tax withholding, whether distributed or not, is calculated at a rate of 19,8% according to the Provisional Articles 61 and 69 of ITL. Whether exempted or not, dividends paid in cash to real persons with full liability and real persons and entities with limited liability (non-residents) are subject to income tax withholding at a rate of 15%. However, income tax withholding is not applicable to the dividends arising from 1998 and prior years' profits and from the exempt profits relating to the years 1999, 2000, 2001 and 2002 as well as income and profits corresponding to the above mentioned investment allowance taxed at the rate of 19,8%. Addition of current year and prior year profits (retained earnings) to share capital has not been regarded as distribution of profits and therefore no withholding tax is applicable to these earnings. On the other hand, no withholding tax is applicable to entities with full liability in profit distributions.

Further, provisional corporation tax is paid at a rate of 20% on the profits declared for interim periods to be deducted from the corporation tax.

2. Presentation of the Financial Statements (continued)

viii. Significant Accounting Policies and Valuation Procedures Applied (continued):

(i) Income Taxes (continued):

For those benefiting from investment allowance according to the provisional article 69 of the Income Tax Law, the corporation tax and corporate provisional tax rate is 30%.

With respect to the article 298 (bis) of the Tax Law amended by Law 5024, the inflation adjustment application which started in 2004 has ended as the increase in the wholesale price indices for the last 36 months and the last 12 months ended March 2005 are below 100% and 10%, respectively. Also, in the 2008 and 2007 accounting periods, the criteria of 100% and 10% have not been realized simultaneously in the Producers Price Index and for that reason no inflation adjustment has been applied.

Under the Turkish taxation system, tax losses can be carried forward to be offset against future taxable income for up to five years. Tax losses cannot be carried back to offset profits from previous periods.

As of 30 September 2008 and 31 December 2007, income tax provisions have been made in accordance with the prevailing tax legislation.

(j) Provision for Termination Indemnity :

Under Turkish Labour Law Article 25/II, the Company is required to pay termination indemnities to each employee who completes one year of service and whose employment is terminated upon causes that qualify the employee to receive termination indemnity, is called up for military service, leaves within one year after marriage (women only), and to those employees who retire or die. The amount payable consists of one month's salary for each year of service. This entitlement is limited to TRY 2.173,19 in respect of each year of service as of 30 September 2008 (31 December 2007 – TRY 2.030,19).

The Company has determined the termination indemnity liability stated in the accompanying financial statements as per the recognition and valuation principles stated in TAS 19 “Employee Benefits”. As the characteristics of the termination indemnity liabilities are similar to the “Post Employment Benefit Plans” stated in this section, these liabilities are calculated and stated in the financial statements on the basis of below mentioned “Proposed Unit Loan Method” and other various assumptions.

2. Presentation of the Financial Statements (continued)

viii. Significant Accounting Policies and Valuation Procedures Applied (continued):

(j) Provision for Termination Indemnity (continued):

- The dates that the employees will gain their pension rights are determined with respect to the prevailing social security laws with consideration to their past employment durations.
- In calculating the current value of future liabilities that may arise due to the retirement or contract termination of an employee, it is assumed that the current salaries and wages or the value of the termination indemnity upper limit determined by the Labour Law for 30 September 2008 and 31 December 2007 to remain constant for restatement purposes, and later on, this value is reduced by the actual discount rate of 5,71% (31 December 2007- 5,71%) calculated upon the assumption that the expected annual inflation rate will be 5 % (31 December 2007 – 5%) and the expected discount rate will be 11% (31 December 2007 – 11%) which represents the proposed average interest rate per annum of the government bonds, in order to determine the current net value of the termination indemnity liability at the balance sheet date.
- Actuarial calculation is needed to determine the ratio of the employees to gain their right for receiving termination indemnity to the total number of employees. This calculation is made through determining the ratio of former Company personnel who received their termination indemnity rights to the total number of personnel.

As of 30 September 2008 and 31 December 2007 actuarial assumptions for calculating termination indemnity are as follows:

	30 September 2008	31 December 2007
Discount rate	5,71 %	5,71 %
The ratio of the number of employees who have gained the right to receive termination indemnity in the prior years to the total number of employees	100 %	100%

(k) Revenues and Expenses:

The accrual basis of accounting is applied for the recognition of revenues and expenses. The accrual concept requires that revenue, income and profits should be matched with costs, expenses and losses belonging to the same period.

(l) Earnings / (Loss) per Share:

Earnings / (loss) per share is calculated by dividing the net profit or loss for the period attributable to ordinary shareholders by the weighted average number of ordinary shares outstanding during the period.

2. Presentation of the Financial Statements (continued)

viii. Significant Accounting Policies and Valuation Procedures Applied (continued):

(l) Earnings / (Loss) per Share (continued)

Companies in Turkey can increase their share capital through distributing shares (bonus shares) from retained earnings and differences arising from inflation adjustments in equity to their current shareholders on a pro rata basis. When calculating profit/(loss) per share, these bonus shares are recognized as issued shares. Therefore, the weighted average of shares used in the calculation of profit/(loss) per share is derived through retroactive application with respect to bonus shares.

(m) Accounting Estimates :

During the preparation of financial statements in accordance with the TAS/TFRS, the Management discloses the balance sheet value of the assets and liabilities stated in the financial statements as of the balance sheet date and explanations regarding off balance sheet liabilities, and to provide assumptions that might affect the totals of income and expense realized during the period. However, actual results may vary from these results.

(n) Subsequent Events:

If the Parent Company and its Subsidiaries receive information after the balance sheet date about conditions that existed at the balance sheet date, the financial statements are updated in line with the new information. If non-adjusting events after the balance sheet date are material, the Company discloses them during the related period.

(o) Conditional Assets and Liabilities:

Assets and liabilities that originate from past incidents and whose presence is not fully under the company management control as it can only be confirmed through the realization of one or more indefinite incidents to take place in the future are not included in the financial statements and are deemed as conditional liabilities and assets.

(p) Borrowing Costs :

Borrowing costs are recognized as expense. Borrowing costs related to the qualifying assets are included directly in the cost of the related qualifying asset. Upon completion of the necessary operations to make the qualifying asset ready for use or sale, the capitalization of the borrowing costs is discontinued. As of 30 September 2008, the borrowing costs amounting to TRY 2.197.941 directly related to the investments in progress are deducted from the cost of the related asset (31 December 2007 – TRY (820.382)).

2. Presentation of the Financial Statements (continued)

viii. Significant Accounting Policies and Valuation Procedures Applied (continued):

(r) Segment Reporting :

For the nine months interim period ended 30 September 2008 and the year ended 31 December 2007, the activities of the Parent Company and its subsidiaries are classified under three sectors, namely, chemistry, textile, and marketing.

(s) Government Incentives and Aids :

The government incentives used by the Parent Company are those related to income and they are recognized in the statement of income.

26. Types and Levels of Risk Arising from Financial Instruments (continued)

ii. Doubtful Receivables Risk

The Parent Company and its subsidiaries have made provision for doubtful receivables developed until the reporting date.

iii. Liquidity Risk

The funding risk of current and future loan requirements is monitored through maintaining continuous access to sufficient number of high quality commercial credit companies. The Parent Company and its subsidiaries create funds through converting short term financial instruments such as trade receivables into cash.

Holding financial instruments may lead to failure of the counterparty to fulfill the terms and conditions of the agreement. The Company management takes measures to prevent such risks through limiting the average risk for the counterparty (except for the related parties) at each agreement, and receiving guarantees if necessary.

As of 30 September 2008, the distribution of financial assets and liabilities of the Parent Company and its subsidiaries as per the related maturities is as follows (TRY):

iv. Interest Risk

The financial loan agreements of the Parent Company and its subsidiaries are denominated in USD, and the interest rates of the short term loans are fixed. Long term loans consist of investment credits and the interest rates are variable. The borrowing costs of long term loans are capitalized through reference to the related investments. As the payments are made in foreign currency, it is assumed that the market interest rate will not be subject to considerable changes until the maturity date; hence the interest rate risk is considered to be negligible.

27. Financial Instruments

The Parent Company and its subsidiaries believe that the recorded value of the financial instruments reflect their fair values. Fair value is the amount for which a financial instrument could be exchanged between two willing parties in an arm's length transaction. It is primarily considered the same as the quoted value of the financial instrument; however in case there is no quoted value, the purchase or sales value of an instrument is deemed to be the fair value of the financial instrument. The significant accounting policies of the Parent Company and its subsidiaries related to financial instruments are disclosed in Note 2 "Presentation of Financial Statements" (a) "Financial Instruments".

For hedging purposes against foreign currency risk, the Parent Company has made American knock out reverse participant forward transactions and the current value of the outstanding forward contract have been calculated as of 30 September 2008 by referring to internal pricing models and the unrealized foreign exchange gains amounting to TRY 109.441 have been recognized in the statement of income (30 September 2007 - none).
